

AI CAREER COUNSELLOR REPORT

Name: an

Recommended Career: Data Scientist

Career Match: 71%

Expected Salary: ■8 - ■15 LPA

Top Companies

- Fractal Analytics
- Tiger Analytics
- Mu Sigma
- Amazon India
- Flipkart

Skills To Learn

- SQL & Database Querying
- Data Visualization (Tableau/PowerBI)
- Deep Learning Frameworks (TensorFlow/PyTorch)
- Big Data Processing (Apache Spark)
- MLOps & Model Deployment

Career Roadmap

- ✓ Step 1: Master SQL and database management to efficiently extract and transform structured data.
- ✓ Step 2: Learn data visualization tools like Tableau or PowerBI to convert complex data into business insights.
- ✓ Step 3: Advance your AI and ML core by practicing Deep Learning techniques using PyTorch or TensorFlow.
- ✓ Step 4: Gain hands-on experience with MLOps and cloud platforms to deploy machine learning models.
- ✓ Step 5: Develop end-to-end data science projects and systematically prepare for technical interview rounds.

AI Recommendation

Your proficiency in Python, Java, Machine Learning, and AI directly aligns with core data science requirements, making you well-positioned to analyze complex data and construct predictive models.
